

Great Correction of the Divine - 20 Aug 2015,

The Cycles of Time... NOW...

Today is 1-Eb/Road = initiates contemplation of consequence and safe guard of the future, protector, conductor of destiny, conduit between heaven and earth "within". In the Universal 46th Day that is 18 days from 15 August to 1st Sept 2015, held by 13-Tijax/Mirror = completes to fruition so as to bare the seeds, the mirror cuts to the truth, enabling you to choose a better path.

In order to advance forwards, the Divine Universe always provides itself with what is needed. By studying the Divine Time Cycles that are reflected in the sacred calender systems of the Maya, it is said that you can consciously tune into the frequencies of the Universe and that this sacred dedication brings great rewards for longevity in your life. As adverse as it may seem, Creation always assists itself to further evolve, Creation feeds itself with a Universal Divine Light resonance which assists further evolution, our human consciousness is leaning to tune itself into the frequencies of the Universe that Creation is ever evolving by. Creations frequency is of our Hearts Divine Light that exists as a mirror of the Universe, manifesting every moment. All human systems were made in an incomplete structure, hence everything is folding over onto itself since the completion of the 9 level Mayan calendar, this is something that one can see happening via the understanding of the Divine Time cycle of Creation, that is fed sacred nourishment from the multidimensional frequencies of Great Mystery.

The folding over is the Great Correction of all incomplete ideals, this is bringing all discords to be amplified and revealed. In order for things to evolve, part of us resists the "change", this then causes the friction that sparks the Heart's inner knowing of what we must "change" by, our inner fire is then ignited and transmutes the discords so as to transcend and rise from the ashes anew, we can then imagine the new dream of peace, into a future tomorrow. Hence we are traveling through a worm hole into new Space/Time, by this understanding we are able to let go and allow the Divine Plan to pull us into a NEW EARTH of love and compassion for all that we are giving birth with and as. In the Red Road walk of sincerity, all obstacles are transformed to become our opposite complimentary. All separations are dissolved so as to become one with

everything. The Universal Light is pulling consciousness through a worm hole, all we can do is let go and trust, this is how humanity is allowing for the Great Correction of the Divine to guide us.

Until we are born and the umbilical chord is yet to be cut, we are attached to our mother, the cyclical resonances of "Time" are our attachment to our Mother Earth's Cycles of existence, we are the children of the Sun living on Mother Earth, that are being born to maturity. When we are born we continue to be nurtured by our mother and feed off her milk. Our connection to our mother is through her cycles that are reflected in us. This is why we feel such a continuing connection to the cycles of "Time". However, once we are fully born and nurtured to adulthood, we as Mother Earth's children will be naturally let go of, but Creations Divine Plan, in so doing, will not allow for us to destroy our Mother Earth. We are Divinely designed from what the original intention is, so as to adapt and evolve, and to live in harmony and peace "together" on Mother Earth, as One Heart that all exists as. So all the relations of Earth, being all earths creatures, are One Heart as all and all as One Heart.

Since the Mayan calendar's fruition on 28 Oct 2011 to 13-Ahau, the new birthing continuing cycles are structured in such a way that they are sucking all through a portal of truth and bringing all to "change" to live in total truth unto itself, we are being pulled into living in "right relation" with each other, to forgive and love each other, so as to be at peace with each other, and live sacredly upon earth. The Divine Plan is allowing for the Greatest of all Correction's and by this the Divine Light Beings of the Universe are dependent on us and we are dependent on the Divine Light Beings of the Universe for support through these miraculous times. All the cycles of the Divine Plan have completed to fruition so as to bring everything to be totally pure and true unto themselves, this is allowing for the seeds of truth to be dispersed. At the same time all the cycles continue from what they were grown by, so as to keep Creations Cosmic Tree of consciousness connected to and from its roots. This is a paradox whereby we are being transcended from a dualistic resonance into a resonance of Oneness, we feel the cycles of evolutions continuation pulling at all to correct the discord it grew by. We are being gifted the opportunity to correct all the discords that ourselves and our ancestors lived by, all we need do is TRUST ourselves fully and know that we will be shown Divine direction with how to clean our karma, which will

happen when we set sacred intentions and allow the Divine to flow through us. We will then consciously process ourselves in a spiritually balance way with the Divine and be the master of our destiny.

Bolon Yokte K'uh, are the "9 Divine Lords of Time" that since the 9 Level Mayan calendar completed have descended on Earth so as to be fully able to live through the collective consciousness, this understanding means that "9 Divine Lords of Time" have taken over the reins and are directing the Will of the Universal Divine Light "within" all. Yet their is that part of consciousness that is not allowing for this to happen. But this part that resists is slowly loosing grip by what the Great Correction is revealing the truth to be. All 9 levels have transcended through each of their 13 "Divine Intentions" as alternating cycles of 7 periods of Light(Days) and 6 periods of Dark(Nights). This completion established the structure that Creation needs to continue to live by, hence by allowing for the cycles to continue to flow through the "Will of the Divine" and bring all into "right relation" through a gradual process, we are being processed to have no option but to align our Heart with the Divine Will of Creations original PRIMORDIAL intention.

The top levels continuation of the cycles is seen in the Ninth Waves ebbing and flowing 18 day rhythm of Days and Nights, this is allowing for the structure of the 9 levels to be held in place to its Divine truth with the continuing cycles having birthed on all 9 levels, hence each of the 9 level cycles, not only continue but start again, so as to bring all to align fully with the Source/Origins of Divine Universal Time, and through us humans, birth the Divine Plan to its intended truth. Those that walk in total truth will be the forbearer's of responsibility, living out the Divine Agreements, and holding sacred the Light of Divine Time, to its Truth. With regards to the understandings of the Divine Time Cycles that the Creator of all put into action, some 16.4 Billion years ago, we can look into the past, study and understand the cycles, and we can look into the future to see when the shift point might take place and we can then know how to surf the waves with the Will of the Divine. We can have a sense of, at least not living blind to what Creation is bringing and has brought in every moment. This is a multidimensional view that can be felt as a timeless resonance, it includes the center point that everything is returning to so as to see from the original intentions of the Divine Source of everything, which is to understand that all exists in ONE HEART.

Thank you to the Universal Healing Frequencies of the Divine Feminine that is flowing through all, so as to bring about balance and allow for the Great Correction of the Divine to process through everything.

From 2nd Sept we go into a 234 day cyclical field of energy held by 1-Cauac/Storm, a time of strong energy, the giver of life and lightning, a time of adverse but complimentary healing energy, allowing for birthing... bringing discords to accord.... stirs things to shift for the greater good... ego is washed away allowing room for new consciousness... purification, activation, dynamic force, healing, nourishment, compassion, gathering energies within. Brings the energy of change and Karmic resolutions...

With Love
